

## Klein Oak Basketball Partner Drills

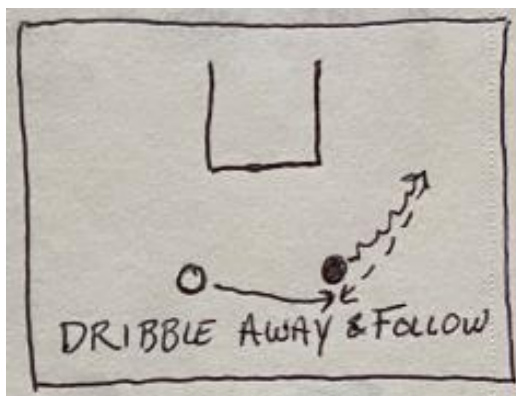

1. Circle round movement: our immediate movements any time the ball is dribbled

Ball handler penetrates hard to basket, teammate slides down to corner on penetration to give ball a passing lane, kick to shooter

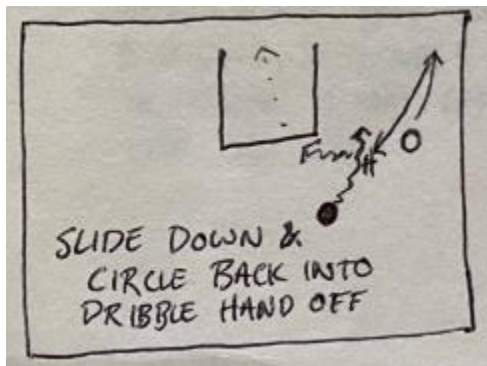

Ball is dribbled at teammate and not penetrated, so it is an immediate backdoor from teammate who is dribbled at, pass for layup

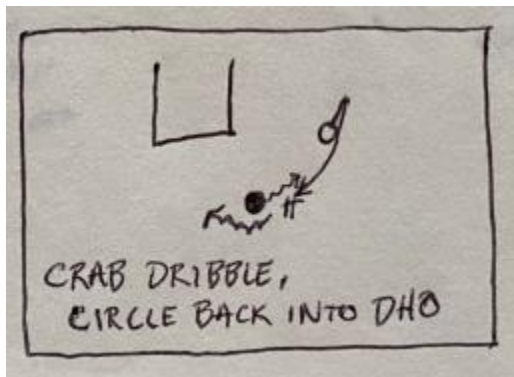

Ball is dribbled away from teammate so teammate circles in direction the ball is going and follows to fill the spot left open, kick back to follow man

(go to next page)

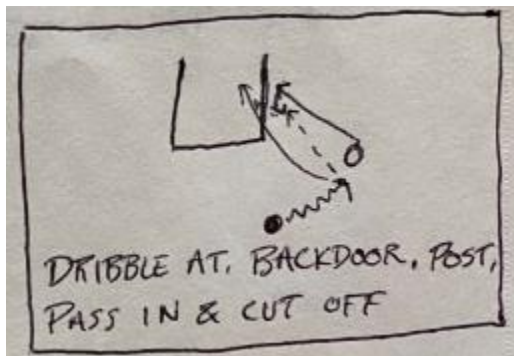

2. Circle Reverse Actions: player circles in direction of the ball, but ball is stopped or picked up so player must reverse back toward ball, usually for a dribble hand off

Ball is penetrated so player slides to corner, ball handler gets stopped and picks up dribble, player sprints back to ball and receives dribble hand off into an elbow jumper

Ball handler turns back to basket and crab dribbles toward next player, which automatically initiates a dribble hand off instead a backdoor, after dribble hand off shoot an elbow jumper or attack the basket

Ball handler dribbles at teammate, he backdoors into a post up at the block, ball handler passes to the post, and then laker cuts off top of ball for a pitch pass layup, or big hop layup
